FOR IMMEDIATE RELEASE

Windsor Debuts Online Building Permits

February 27, 2014: In an effort to enhance customer service and convenience for licensed contractors, the Town of Windsor is now offering online processing and inspection scheduling for a wide range of common building permits.

Online application and approval for the following over-the-counter permits is now available for the installation of solar systems, water heaters, furnaces, air conditioners, reroof projects, and electrical service panel upgrades of 200 amps or fewer. Staff monitors the system on a daily basis to ensure the accuracy and applicability of permits issued.

This service is accessible 24 hours day, 7 days a week at <https://licensing.townofwindsor.com/eTRAKiT3/>. Currently, this new service is offered only to California licensed contractors registered with the Town's Building Division. To register with the Town of Windsor, contact Steve Pantazes, Building Official, at 707-838-5341. The general public can also use the on-line system, called eTrakit, to search building permit history for individual properties.

According to Building Official Pantazes, "Anyone using eTrakit will quickly realize how user friendly it is. Above all, contractors will appreciate the convenience of applying for, scheduling inspections, and paying for permits online. Our goal is to provide exceptional service to the community, and we believe that eTrakit is a great start to a positive permitting experience."

For further information, please call Building Official, Steve Pantazes at 707-838-5341 or spantazes@townofwindsor.com.
