

Community Car Wash Kit Instructions

Contents of Kit
1. Storm drain inlet cover (mat)
2. One Soaker hose
3. Two garden hoses
4. Spray nozzles with automatic shut-off valves
5. Submersible Pump
6. Rubber dam
7. Extension cord and plug
8. Bucket to hold extension cord and pump plug with lid

Instructions

1. Place the cover over the storm drain
2. Place the dam in a U-shape in front of the storm drain cover, partially overlaying it.
3. Place the pump inside the U-shaped dam and hook one end of the soaker hose to the pump.
4. Place the other end of the soaker hose in a grassy or gravel-covered area that will receive the wash water. The wash water should not drain to a paved area.
5. Place bucket just outside of the dam area in a location that running water will not tip the bucket.
6. Plug the electrical extension cord into the pump inside the bucket provided.
7. Place lid on bucket to keep electrical components out of water.
8. Do not allow vehicles to drive over the electrical extension cord.
9. Be sure to use the automatic shut-off valves on the wash hoses.
